From Greyson Ferguson Omniform is a free computer program to use that allows you to convert a variety of different word-processing formats. This means that if you have a PDF file or Word Perfect, you can convert it to a Word file. This allows you to take files from any program, convert them, then open files in Word as if the document had been composed in the Microsoft program. Download and install Omniform if it is not currently installed on your computer. You can download it from OmniFormat.com. OmniFormat supports all Windows formats from Windows 95 to Windows 7. Launch the Omniform software you installed on your computer. Wait for the program to open completely, then click "File" followed by "Open". Select the document you want to convert to Word. Select a save location for your Word document in a short time. There is a drop-down menu available on the main screen for you to do this. You can select any location on your computer or connected memory device (such as a flash drive or an external hard drive). Select the ".doc" format from the list available through the format drop-down menu. . Doc is Word file format. Click "Convert" and the document is converted to a Microsoft Word format. Now you can easily open it in Word and edit it as if you had created the file in the program. By Sara Tetreault You can create fillable modules for a myriad of uses, such as surveys, work applications and colleges, and various other documents that you could use to collect information. Steps for creating a module in Microsoft Word are easy to remember and do not require thorough knowledge of other aspects of the program. To create a new document, select "New" from the "MS Office" button. Click "My Models" under "Templates" and double-click "Normal" to create a template or a templateUnder "Create New." Save the document by clicking "Save as". Give the document a name and save it. Click "Design Mode" under the "Develop" tab in"Controls" group. Click on the document where you want to enter a control. Enter a field where users can enter the text by clicking on "Rich Text" or "Text" and then clicking in the document where you want to view this control. Insert a text fill in the field by clicking "Legative Tools" and then "Text Shaped Files" from the "Development" tab. In the "Controls" group, choose "Design mode" and click "Underline" to add a line under the field; click "Property" to limit the amount of characters that can be inserted in the field. Insert a lighted descent by clicking on "Drop-Down List" under the tab "Developer". Select content control and in the "Controls" group, click "Properties" under the "Developer" tab. Create a list of choices under the "Down-list Properties" by clicking "Add". Enter a checkbox by clicking "Check Box Form Field" under "Legacy Tools". Click "Check Box Form Field", type a space and start typing a label. Stuck with a PDF file and no application that allows you to edit it?
