Torque adjustment
"+": Torque increase direction shown fig-2
"-": Torque decrease direction shown fig-2

Notes: Ensure display weight is within load range.

- 1.If display can be hovered at any height after display installed.**
No adjustment needed.
- 2.If display lift up automatically after display installed, adjust the following: One man hand press down the screen, the other wind set screw at the bottom of upper arm at joint to ' - ' direction to reduce torque by using G, 5mm. Allen key as shown in Fig-E1 and E2 until display can be hovered at any point of positions.**
- 3.If display sit at the lowest position after installation, repeat #2 procedures but winding set screws to ' + ' direction to increase torque as Fig-E1 and E2 until display can be hovered at any point of positions.**

06 SEP 2022 Huawei launched its Mate 50 series in the Chinese market, with the pro device including limited satellite connectivity but still no 5G access, as US sanctions continue to prevent access to the latest Qualcomm chipsets delivering the technology. In translated promotional material, Huawei noted the Mate 50 Pro was able to send text and location information to the BeiDou satellite constellation in the absence of standard connectivity. It, however, cannot receive text messages from the birds. Huawei noted the satellite option breaks “the limitations of terrestrial networks and [could] connect with the world at ease.” Handset connection with satellites has been the subject of speculation surrounding the upcoming unveiling of Apple’s next iPhone, expected at an event later this week, and created somewhat of an industry buzz this year with various connectivity deals and trials announced. Aside from the satellite element, the Mate 50 series was promoted on its camera, screen and various durability features including water resistance and drop damage protection. The Mate 50 Pro has a 6.74-inch screen, 4700 mAh battery, first generation Snapdragon 8+ 4G octa-core processor, triple rear camera set-up with the main unit 50MP and a 13MP front camera. Huawei’s standard version has most of the same specifications but is slightly smaller at 6.7-inches with a 4460 mAh battery. It also has lower internal memory and lacks several features including the satellite connectivity. Along with the pair available now, Huawei also unveiled the Mate 50E, which is the same size and battery as the standard version, but with one fewer camera and a Snapdragon 778G 4G chipset. It is yet to go on sale. The Pro version is on sale for CNY6,799 (\$977.63) with the standard issue at CNY4,999. Subscribe to our daily newsletter Back If you want to make your app available for download for a global audience, you need to list it in app stores. Now, most app stores charge a fee on paid apps and in-app purchases. As a typical middleman, they take a cut of the app revenue for facilitating your app distribution. That’s how app stores make their money. In this post, we’re taking a look at Apple App Store fees, Google Play Store fees, and highlight fees for some other bigger app stores. How do Google Play Store and Apple App Store make money? The standard commission rate for distributing your app seems to be 30%, but each app store also has its exceptions. More precisely, the app store revenue comes from taking a commission on: in-app purchases;subscriptions; downloading paid apps. Note: In-app purchases (IAP) include any transactions performed inside the app except the purchase of physical goods, like booking a flight in a travel app. If you use advertising inside your mobile app as your app monetization strategy, then app stores cannot charge you for that. Apple App Store fees App distribution via Apple App Store gives access to over a billion customers in 175 countries and regions on iPhone, iPad, Mac, Apple TV, and Apple Watch. There are no hosting fees, but there’s an annual fee of \$99 for the Apple Developer Program (\$299 for the enterprise version). And Apple will take a share of your app revenues. So how much percentage does Apple take from your app revenue? Until November 2020, it was a 30% commission from the total price of all paid apps and in-app purchases from the App Store. However, since then, two rates can apply: 30% share when you make more than \$1 million in annual net app revenue;15% share when you:make less than \$1 million in annual net app revenue;when you’re new to the App Store;you’re after 12 months of service in the App Store with a subscription-based app. Note: Apply for the App Store Small Business Program that was started on the 1st of January 2021 in order to qualify for the 15% app store commission fee. According to Sensor Tower, an estimated 98% of app developers should be eligible for this. If you’re wondering how Apple makes sure to get a share of your app revenue, then here’s the answer: If you want to unlock features or functionality within your app (by way of example: subscriptions, in-game currencies, game levels, access to premium content, or unlocking a full version), you must use in-app purchase. Google takes a 30% share of your app revenue as well, and also Google’s cut on your revenue for subscriptions decreases to 15% after a year. There’s also a one-time \$25 registration fee for the developer account. Make sure to understand the financial aspects of your app model and how it impacts your Google Play Store optimization strategy. Just like Apple, also Google makes sure to legally oblige you to give a share of your app revenue. Here’s a snippet from Google’s guideline: Developers charging for apps and downloads from Google Play must use Google Play’s payment system. For in-app purchases, developers must use Google Play In-app Billing as the payment method except if the payment is solely for physical products or digital content. Interesting fact: Just before Christmas 2020, a lawsuit against Google’s app store fees was being prepared; read more here. Google and Apple fee comparison with other app stores In the table below, you’ll find commission levels of 12 other app stores so you can compare their charges with Google and Apple app store policies. APP STORE NAMECOMMISSION LEVELSApple App Store (app store for Apple devices)■ 30% for apps and in-app products■ Except 15% for subscriptions after 12 months■ One-time \$25 registration fee for a developer accountAmazon Appstore (app store for Amazon and Android devices)■ 30% for apps, in-app products, and in-app subscriptions■ Except 20% for movies and TV in-app subscriptions■ 30% of PC games and software retail price (or 80% of the list price if less)Samsung Galaxy Store (app store for Samsung devices)■ 30% (or otherwise agreed-upon rate)Microsoft Store (digital content store for Windows devices)■ 30% of net receipts for games and in-app products in games■ 30% of net receipts for purchases in Microsoft Store for Business, MicrosoftStore for Education, Microsoft Store on Windows 8 and Windows Phone 8 devices■ 15% of net receipts for all other products■ One-time registration fee of \$19 for individual developer accounts and \$99 for company developer accountsAptoide (open sources app store for Android devices)■ 25% for certified publishers (or otherwise agreed upon rate)LG SmartWorld (app store for LG devices)■ 30% (or otherwise agreed upon rate)MyApp (Tencent’s app store for Android devices)■ 55% for games■ 30% for new Tencent games starting 2019*Huawei AppGallery (app store for Huawei devices)■ 50% for game in-app purchases■ 30% for paid downloads and non-game in-app purchases■ 20% for education apps■ 30% for new Tencent games starting 2019*OPPO Software Store (app store for OPPO devices)■ 52.5% for gamesQihoo 360 (app store for Android devices)A tiered structure for games, calculated monthly:■ 20% below ¥100,000■ 40% from ¥100,000 to ¥1,000,000■ 50% from ¥1,000,000 to ¥5,000,000■ 64% over ¥5,000,000■ 30% for new Tencent games starting 2019*Vivo App Store (app store for Vivo devices)■ 52.5% for gamesMIUI App Store (app store for Xiaomi devices)■ 50% for games■ 30% for new Tencent games starting 2019*MM Store (China Mobile’s app store for Android devices)■ 52.5%■ +23.75% commission for promotion optionsComparison of commission rates and fees for various app stores; source: analysisgroup.com Most app stores take a 30% commission on app revenues from in-app purchases, subscriptions, and paid app downloads. As typical middlemen, that’s the way they make their money. If you’re just getting started with your app distribution, do reach out to App Radar’s team! Our experts are here to prepare your app store launch so that you can start making app revenue faster. Weight: Approx. 449 g (including battery) *Refers to the weight of the GOT-W29 model. The GOT-AL09 model weighs approximately 455 g (battery included). Data comes from Huawei Labs. Actual weight of specific product may vary depending on the configuration, manufacturing process, and measurement method. *Product size, product weight, and related specifications are theoretical values only. Actual measurements between individual products may vary. All specifications are subject to the actual product. Resolution: WQXGA 2560 × 1600***, 274 PPI Colour: 1.07 billion colours, P3 wide colour gamut Type: OLED up to 120 Hz refresh rate 1440 Hz high frequency PWM dimming *The screen is designed with rounded corners. When measured according to the standard rectangle, the diagonal length of the screen is 11 inches (the actual visible area is slightly smaller). **Data from Huawei labs. The screen-to-body ratio is calculated by comparing the screen active area to the front panel area of the device. Actual measurements may vary. ***Resolution is calculated based on a standard rectangle. Actual number of effective pixels on the screen with rounded corners is slightly lower. GOT-AL09: Qualcomm® Snapdragon™ 808 Mobile Platform GOT-W29: Qualcomm® Snapdragon™ 870 Mobile Platform CPU: GOT-AL09: Octa-core, 1 × Cortex-X1@2.84 GHz + 3 × Cortex-A78@2.42 GHz + 4 × Cortex-A55@1.8 GHz GOT-W29: Octa-core, 1 × Cortex-A77@3.2 GHz + 3 × Cortex-A77@2.42 GHz + 4 × Cortex-A55@1.8 GHz *The available internal storage may be smaller as part of the internal storage is occupied by software. *May vary in different market. Subject to the actual product. Rear camera: 13 MP(f/1.8 aperture, AF) + 8 MP(wide angle length, f/2.2 aperture, FF) *The photo pixels may vary depending on the shooting mode. Image resolution: Up to 4208 × 3120 pixels *The actual image resolution may vary depending on the shooting mode. Video Resolution: Up to 3840 × 2160 pixels *The actual video resolution may vary depending on the shooting mode. Rear Camera Capture Mode: GOT-AL09: Time-Lapse, Wide Angle Lens, Aperture, Night, Portrait, Pro, Slow-Mo, Panorama, Mono-Chrome, Filter, Stickers, Documents, Master AI, Moving Picture, Capture Smiles, Audio Control, Timer, Burst Shooting GOT-W29: Time-Lapse, Panorama, Stickers, Documents, Audio control, Timer, Burst shooting Front camera: 16 MP (f/2.2 aperture, Fixed Focal) *In different photo modes, the number of pixels may be slightly different, please refer to the actual situation. Image resolution: Up to 4608 × 3456 pixels *The actual image resolution may vary depending on the shooting mode. Video Resolution: Up to 1920 × 1080 pixels *The actual video resolution may vary depending on the shooting mode. Front Camera Capture Mode: GOT-AL09: Portrait, AR lens, Time-Lapse, Moving Picture, Filter, Stickers, Capture Smiles, Mirror reflection, Audio Control, Timer GOT-W29: Beauty mode, Time-Lapse, Stickers, Mirror reflection, Audio control, Timer 8300 mAh (typ.) *Typical value. Rated value of battery is 8200 mAh. Actual capacity may vary slightly. The battery is built-in and cannot be removed. GOT-AL09: Standard charger supports 10V/4A output (Supports up to 11V/6A HUAWEI SuperCharge.)* *66 W SuperCharge and charging cable needs to be purchased separately. GOT-W29: Standard charger supports 10V/2.25A output (Supports up to 10V/4A HUAWEI SuperCharge.)* *40 W SuperCharge and charging cable needs to be purchased separately. WLAN: GOT-AL09: Supported, 802.11a/b/g/n/ac/ax, MIMO, HE160, 2.4 GHz and 5 GHz GOT-W29: Supported, 802.11a/b/g/n/ac/ax, MIMO, HE80, 2.4 GHz and 5 GHz Bluetooth: GOT-AL09: Bluetooth 5.2, BLE, SBC, AAC, LDAC HD Audio are supported. GOT-W29: Bluetooth 5.1, BLE, SBC, AAC, LDAC HD Audio are supported. OTG: Supported (maximum output current 1.5A/5V during reverse power supply) *This function should be used with the USB 3.1 GEN1 cable (non-standard USB cable, need to be purchased separately) that supports this function. *The inbox USB cable supports USB 2.0.
